OBJECTIVE

Motivated Electronics and Communication Engineering graduate with a solid foundation in Core Java, Object-Oriented Programming, SQL, and HTML, along with working knowledge of Python. Hands-on experience building IoT and web-based solutions through academic and personal projects. Seeking an entry-level / Associate Software Engineering, Software Developer, or Java Developer role to apply strong problem-solving skills, software development fundamentals, and a quick-learning mindset to real-world engineering challenges.

EDUCATION

Bachelor of Technology in Electronics and Communication Engineering 2023 – 2026

Annamacharya Institute of Technology and Sciences, Rajampet | CGPA: 8.78

Diploma in Electronics and Communication Engineering 2020 – 2023

Government Polytechnic, Pillaripattu, Puttur | CGPA: 9.04

Secondary School (10th) 2019 – 2020

Sri Chaitanya School, Chittoor | CGPA: 9.8

SKILLS

Programming: Core Java, Object-Oriented Programming (OOP), Python (Basics), AI/ML

Database: SQL (DML, DQL, DDL, CRUD Operations)

Web Technologies: HTML

Networking: Networking Fundamentals (OSI Model, TCP/IP)

Tools & Version Control: Git, GitHub, VS Code, IntelliJ IDEA, MySQL Workbench, MS Office (Word, Excel)

Soft Skills: Critical Thinking & Problem Solving, Attention to Detail, Team Collaboration, Proactive Communication

CERTIFICATIONS

- Internet of Things – NPTEL

PROJECTS

ElectroCart – Electronic Products E-Commerce Platform

Tech Stack: Java, Servlets, JSP, JSTL, HTML5, CSS3, MySQL, JDBC, Apache Tomcat, Maven | MVC Architecture

- Developed a customer-facing e-commerce web application for browsing, searching, filtering, and purchasing electronic products, with cart, wishlist, checkout, and order-tracking functionality.
- Implemented MVC architecture using Java Servlets as controllers, JSP/JSTL for dynamic views, POJO-based models, and DAO interfaces with JDBC implementations for database operations.
- Designed a MySQL relational database with 12 tables to manage users, products, categories, specifications, addresses, cart, wishlist, orders, and payment records.
- Implemented session-based authentication, BCrypt password hashing, OTP-based password reset, parameterized SQL using PreparedStatement, and stock validation during checkout.

Intelligent IoT-Enabled Smart Precision Farming System for Soilless Agriculture with Environmental Management

Tech Stack: Python, Embedded C, Arduino Mega, NodeMCU, ThingSpeak

- Developed an IoT-based automation system for soilless agriculture, reducing manual intervention by 80%.
- Implemented real-time monitoring of pH, TDS, temperature, and humidity through sensor integration.
- Built a plant disease detection module using Python-based image processing, achieving 90.67% accuracy.
- Integrated a ThingSpeak cloud dashboard for live data visualization and remote monitoring.
- Designed an automated nutrient dosing and control system to optimize plant growth.

STRENGTHS

- Quick learner with strong adaptability to new tools and technologies.
- Fluent in English (reading, writing, and verbal communication).
- Effective time management and ability to work well under pressure.
- Strong communication and team collaboration skills.

INTERESTS & HOBBIES

- Playing cricket on weekends to stay active, maintain fitness, and relieve stress.
- Committed to continuous learning and professional development.
